EXECUTIVE SUMMARY

The Annual Report Card (ARC) is distributed to agency managers and to the legislative committees dealing with children and youth. The ARC for State Fiscal Year (SFY) 2004 consists of three parts:

- 1. **Performance Indicators**, which provide information on service outcomes, such as:
 - a. Percentage of Families with True Allegations of Child Maltreatment Three Months, Six Months and One Year After a Previous True Report
 - b. Percentage of Siblings in Placement who Are Placed Together
 - c. Percentage of Children Living with Adoptive Families within Twelve Months of the Termination of Parental Rights
- 2. **Compliance Index**, which reports on the Division's compliance with requirements set by DCFS with guidance from the Arkansas legislative children and youth committees, such as:
 - a. Timely Completion of Child Maltreatment Assessments
 - b. 24- and 72-Hour Initial Health Screenings for Children Entering Foster Care
 - c. Foster Home Recruitment
- 3. **Description of Population and Services,** which describes the children who were the subjects of maltreatment reports, were served in foster care and were provided adoption services, such as:
 - a. Types of Allegations in Child Maltreatment Reports
 - b. Permanency Goals of Children in Foster Care
 - c. Characteristics of Children Placed in Adoptive Homes

The ARC provides this information on a yearly basis, showing trends over time. Descriptions of the client population at the various service stages are provided as well, so that the agency has information on populations and issues to target during efforts to improve performance.

Part I: Performance Indicators

The Division of Children and Family Services (DCFS) has established nine performance indicators to measure progress with regard to its major goals of child safety, permanency and well-being.

The Division improved in one area regarding performance indicators this fiscal year:

 Percentage of Children in Foster Care who Experienced More than Three Placements within Eighteen Months of Entering Care

The percentage of children in foster care who experienced more than three placements within eighteen months of entering care was **16 percent**, three percentage points lower than the previous year (19%).

 Percentage of Children Living with Adoptive Families within Twelve Months of Termination of Parental Rights

The percentage of children living with adoptive families within 12 months of the termination of parental rights was **60 percent**, six percentage points higher than the previous year (54%).

The Division has continued its efforts toward meeting these goals. However, there were two areas identified for improvement this year:

 Percentage of Children Receiving Supportive Services who were Abused or Neglected within One Year of the Initiation of Services

The percentage of children who were abused or neglected within one year of receiving supportive services was **8 percent**, three percentage points higher than the previous year (5%).

 Percentage of Children Receiving Protective Services who Entered Care within One Year of the Initiation of Services

The percentage of children who entered care within one year of receiving protective services was **10 percent**, two percentage points higher than the previous year (8%).

Part II: Compliance Index

DCFS has set compliance measures with guidance from the House Committee on Aging, Children and Youth, Legislative and Military Affairs and the Senate Interim Committee on Children and Youth. An index is compiled by reporting the level of compliance with these measures.

The Division improved in three areas regarding compliance requirements this fiscal year:

Timely Initiation of Child Maltreatment Assessments

The percentage for timely initiations increased from 84 percent in SFY 2003 to **90 percent** in SFY 2004, a six-percentage point increase but below the goal of 95 percent.

Comprehensive Health Assessments

The percentage for comprehensive health assessments increased from 89 percent in SFY 2003 to **92 percent** in SFY 2004, a three-percentage point increase but below the goal of 95 percent.

Foster Home Re-evaluations

The percentage for foster-home re-evaluations increased to **96 percent**, two percentage points higher than SFY 2003, and also met the goal of 95 percent.

While the Division improved in three areas, there were three other areas which decreased in compliance this fiscal year, including:

Timely Completion of Child Maltreatment Assessments

The percentage for timely completion stood at **66 percent**, lower than SFY 2003 (76%) and below the goal of 90 percent.

Foster Home Recruitment

There were 256 new foster homes recruited and approved during SFY 2004. This was **80 percent** of the goal and 12 percentage points lower than SFY 2003.

24- and 72-Hour Initial Health Screenings

The percentage for 24-hour initial health screenings decreased from 88 percent in SFY 2003 to **84 percent** in SFY 2004, a four-percentage point decrease and below the goal of 95 percent.

The 72-hour initial health screenings decreased from 92 percent in SFY 2003 to **90 percent** in SFY 2004, a two percentage point decrease and below the goal of 95 percent.

Part III: Description of Population and Services

This section describes the number and status of maltreatment assessments, services provided, children who were subjects of maltreatment reports, children who were served in foster care and children who received adoption services.

There were no remarkable differences in population and services between SFY 2003 and SFY 2004. However, when trends were observed from SFY 1999 to SFY 2004, there were notable differences, including:

• Supportive Services, Protective Services and Foster Care

The combined number of supportive services, protective services and foster care cases decreased by less than one percent from last year, but was still **22 percent** higher than SFY 1999 (13,273 cases).

Foster Care Children by Age

There was a slight increase in the number of foster children ages 12 and older from last year, but there was a **50 percent** increase from SFY 1999 (1,705 children) to SFY 2004 (2,553 children).

PART I: PERFORMANCE INDICATORS

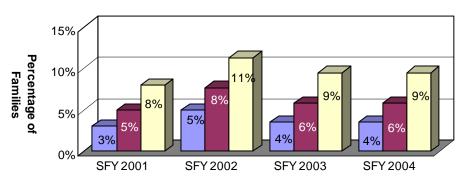

The Division has established nine performance measures to indicate levels of achievement of its major goals of child safety, family preservation and permanency:

- Percentage of families with true allegations of child maltreatment three months, six months and one year after a previous true report;
- Percentage of foster families with true reports of maltreatment;
- Percentage of children receiving Supportive Services, Protective Services or Intensive Family Service (IFS) who were abused or neglected within one year of the initiation of services;
- Percentage of children receiving Supportive Services, Protective Services or Intensive Family Service (IFS) who entered foster care within one year of the initiation of services;
- Percentage of children in foster care who returned home within 18 months;
- Percentage of children in foster care who have experienced more than three placements within eighteen months of entering care;
- Percentage of siblings in foster care who are placed together;
- Percentage of children living with adoptive families within 12 months of the termination of parental rights; and
- Number of children placed in pre-adoptive homes whose adoption were finalized within 12 months of entering a pre-adoptive placement.

Percentage of Families with True Allegations of Child Maltreatment Three Months, Six Months and One Year after a Previous True Report

Of the 5,640 families who were involved in a true report of maltreatment between July 2002 and June 2003, 210 families (4%) experienced a repeat true allegation of maltreatment within three months of the initial report. Of those same 5,640 families, 331 (6%) were involved in a repeat true report within six months of the original report and 535 (9%) were involved in a repeat true report within 12 months of the first report¹. All percentages remained the same from SFY 2003.

Chart 1: Percentage of Families with True Allegations of Child Maltreatment within 3 Months, 6 Months and One Year after a Previous True Report

^{■ 3} Months ■ 6 Months ■ 1 Year

1

¹ Of the 535 repeat referrals during the year, 260 (49%) involved both the same type of abuse and the same perpetrator.

Percentage of Foster Families with True Cases Reports of Maltreatment

There were 113 foster home maltreatment reports received during SFY 2004. Of those, 13 were found to be true. Based on the 1,719 open DCFS foster homes during the year, the percentage of foster families with true reports of maltreatment was .76 percent. This percentage has steadily increased since SFY 2001.

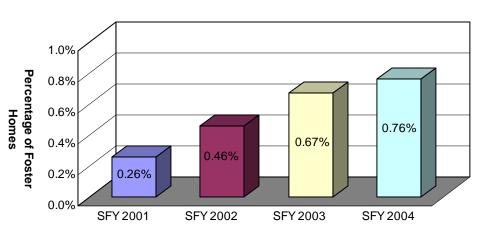

Chart 2: Percentage of Foster Families with True Cases of Maltreatment

Percentage of Children Receiving Supportive Services, Protective Services or Intensive Family Services who were Abused or Neglected within One Year of the Initiation of Services

There were 1,229 children who began receiving supportive services (SS) between July 2002 and June 2003. Of those children, 94 or eight percent were involved in a true maltreatment report within one year of initiation of services. There were 11,775 children who began receiving protective services (PS) during that same time period, and of those children, 512 (4%) experienced a true report of maltreatment within one year. Of the 310 children who began receiving intensive family services (IFS), 10 children (3%) were involved in a true report within a year of the initiation of services². For supportive services, the percentage of children who were abused or neglected within one year of the initiation of services increased, while the percentage for protective services decreased and the percentage for IFS remained the same for SFY 2004.

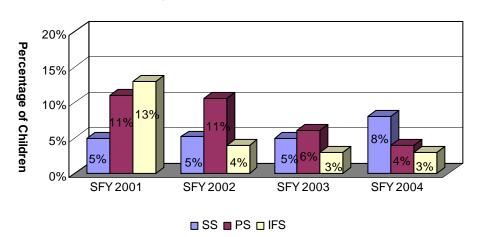

Chart 3: Percentage of Children Receiving PS, SS or IFS Services who were Abused or Neglected within One Year of Initiation of Services

_

² Generally, families who receive supportive services have less severe problems, while families receiving intensive family services are, by definition, in imminent risk of having one or more child(ren) placed in foster care or already have children in foster care. Protective services families fall somewhere between those extremes.

Percentage of Children Receiving Supportive Services, Protective Services or Intensive Family Services who Entered Care within One Year of Initiation of Services

Of those 1,229 children who began receiving supportive services (SS) between July 2002 and June 2003, only 22 (2%) entered foster care within one year of initiation of those services. Of the 11,775 children who began receiving protective services (PS) during that same time period, 1,129 (10%) entered foster care within one year of initiation of services. Twenty-six children (8%) of the 310 children who began receiving intensive family services (IFS) entered foster care within one year of receiving those services.

Chart 4: Percentage of Children Receiving SS, PS or IFS Services who Entered Foster Care within One Year of Initiation of Services

Percentage of Children in Foster Care who Returned Home within Eighteen Months

There were 3,326 children who entered foster care between January 2002 and December 2002. Of that number, 2,151 children (65%) returned home within six months, 2,549 children (77%) returned home within 12 months, 2,678 children (81%) returned home within 15 months and 2,770 children (83%) returned home within 18 months of entering foster care.

SFY 2001

Percentage of Children in Foster Care who Experienced more than Three Placements within Eighteen Months of Entering Care

Of those same 3,326 children who entered foster care between January 2002 and December 2002, 540 children (16%) experienced more than three placements within 18 months of entering care³. This is three percentage points lower than SFY 2003.

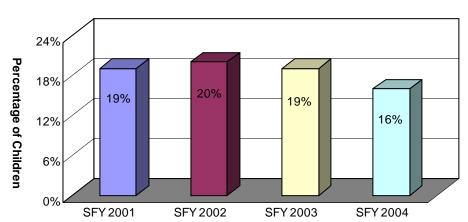

Chart 6: Percentage of Children in Foster Care who Experienced More than Three Placements within Eighteen Months of Entering Care

_

³ As reported in the SFY 2003 Multiple Placement Report, the children experiencing a high number of placements are primarily older children.

Percentage of Siblings in Foster Care who are Placed Together

At the end of SFY 2004, there were 1,647 children in foster care that also had siblings in foster care. Of those children, 1,158 were placed with at least one of their siblings (70%), while 802 (49%) were placed with all of their siblings. These figures do not exclude children who have been placed separately for valid reasons such as safety issues or court orders.

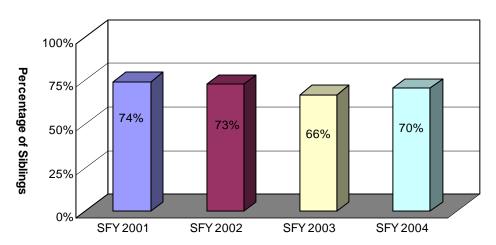

Chart 7: Percentage of Siblings in Care who are Placed Together

Percentage of Children Living with Adoptive Families within Twelve Months of Termination of Parental Rights

There were 418 children with the goal of adoption whose parents also had their parental rights terminated between July 2002 and June 2003. Of those children, 251 (60%) were placed with adoptive families within 12 months of the termination of parental rights. This was an increase from SFY 2003 (54%).

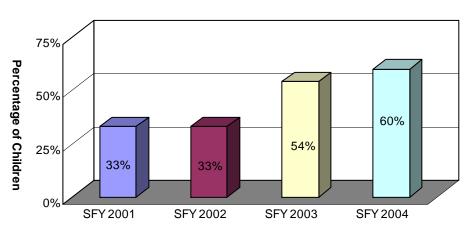

Chart 8: Percentage of Children Living with Adoptive Families within 12 Months of Termination of Parental Rights

Children Placed in Pre-adoptive Homes whose Adoptions were Finalized within Twelve Months of Entering Placement

There were 293 children who were placed in pre-adoptive homes between July 2002 and June 2003. Of those, 163 children or 56 percent had finalized adoptions within 12 months of being placed in their pre-adoptive home.

Of the children who were placed in pre-adoptive homes during SFY 2004, 44 (15%) experienced disruptions. A disruption occurs when a child has been placed in a pre-adoptive home and the family or the child has decided not to proceed with the adoption and the child leaves the pre-adoptive home.

Of the 293 children placed in pre-adoptive homes, there were 125 children whose adoptions were still pending finalization 12 months after their placement.

Table 1: Children Placed in Pre-adoptive Homes during SFY 2004 whose Adoptions were Finalized within 12 Months of Entering Placement

	SFY	2003	SFY 2004		
Status	Number	Percentage	Number	Percentage	
Finalized Adoption	148	67%	163	56%	
Disrupted Adoptive Placements	41	19%	44	15%	
Children with a Disruption who were Replaced in a Pre-adoptive Home	30	14%	39	13%	
Still Pending at the End of the Year	61	28%	125	43%	

PART II: COMPLIANCE INDEX

The Division has set compliance measures with guidance from the Joint Interim Committee on Children and Youth. An index is compiled by reporting the level of compliance with these measures.

Goal Compliance Measure

- **95%** *Timely Initiation of Child Maltreatment Assessments.* The investigator interviews or observes the victim child outside the presence of the alleged offender within 24 hours of any alleged severe maltreatment or within 72 hours otherwise.
- **90%** *Timely Completion of Child Maltreatment Assessments.* A determination must be made regarding an allegation of child maltreatment within 30 days of receipt of the allegation.
- **24-Hour Initial Health Screenings.** The screening is conducted within 24 hours after removal from the home on children who enter foster care due to an allegation of severe maltreatment, or if there is evidence of acute illness or injury.
- **72-Hour Initial Health Screenings.** This screening is conducted within 72 hours after removal from the home on all children who enter foster care who are not subject to the 24 hour screening.
- **95%** Comprehensive Health Assessments. Within 60 days of a child's entering foster care, an evaluation of their physical and mental health status must be completed.
- **Foster Home Recruitment.** DCFS must ensure a sufficient number and variety of foster homes are available which meet minimal standards and match the needs and characteristics of foster children.
 - **95%** Foster Home Re-evaluations. DCFS must re-evaluate, at least annually, each foster home's ability to care for children.
 - **85%** Required Visits Made by Worker. DCFS must provide data on the percentages of required weekly visits made by DCFS workers to children in foster care.

Timely Initiation of Child Maltreatment Assessments

There were 20,536 referrals for child maltreatment assessments during SFY 2004. Of that number, 15,280 (74%) referrals were assigned to DCFS for investigation. Of those referrals assigned to DCFS, 13,765 assessments were initiated within the required period. This resulted in a compliance rate of 90 percent, higher than the three previous years, but lower than the goal of 95 percent.

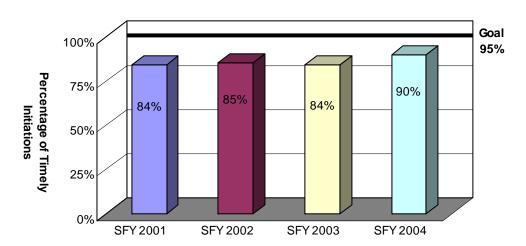

Chart 9: Timely Initiation of Child Maltreatment Assessments

Timely Completion of Child Maltreatment Assessments

Of the 15,280 assessments initiated, 10,009 were completed within the required 30-day period. This resulted in a compliance rate of 66 percent, lower than SFY 2003 and below the goal of 90 percent.

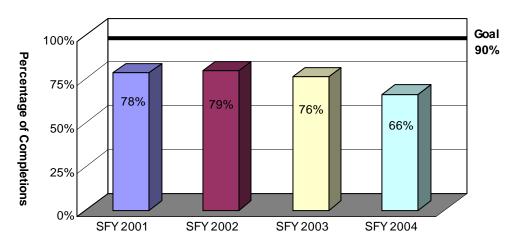

Chart 10: Timely Completion of Child Maltreatment Assessments

24- and 72-Hour Initial Health Screenings

If a child enters foster care due to an allegation of severe maltreatment or if there is evidence of acute illness or injury, an initial health screening must be conducted within 24 hours of the child's removal from the home. Of the 424 children who required the 24-hour health screening during SFY 2004, 358 (84%) received the screening in a timely manner. The compliance rate was four percentage points lower than SFY 2003 and below the goal of 95 percent.

All children entering foster care and that do not require the initial 24-hour health screening must undergo an initial health screening within 72 hours of their removal. Of the 2,826 children who required their health screening within 72 hours, 2,542 (90%) received their screenings in a timely manner, two percentage points lower than SFY 2003 and below the goal of 95 percent.

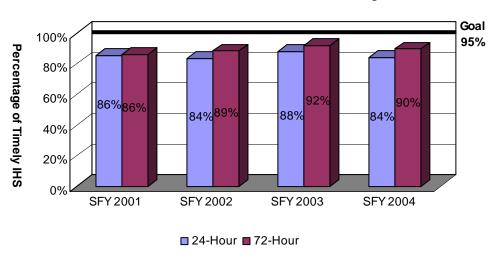

Chart 11: 24- and 72-Hour Initial Health Screenings

Comprehensive Health Assessments

All children who enter foster care must receive a comprehensive health assessment to evaluate their physical and mental health status within 60 days of entering foster care. There were 1,417 children who entered foster care between May 2003 and April 2004 and who remained in care for at least 60 days. Of those, 1,307 children received their comprehensive health assessment within 60 days of entering care. The resulting compliance rate was 92 percent, which is the highest compliance rate achieved over the last four years, but still slightly below the goal of 95 percent.

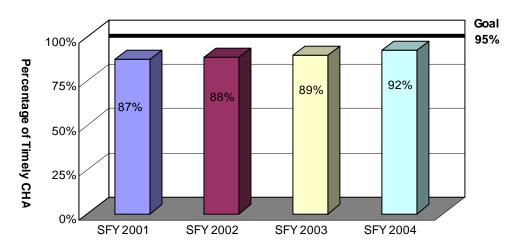

Chart 12: Comprehensive Health Assessments

Foster Home Recruitment

There were 256 new foster homes recruited during SFY 2004. This was 64 less than the goal of 320 homes for the state fiscal year. This number resulted in a compliance rate of 80 percent, 12 percentage points lower than SFY 2003.

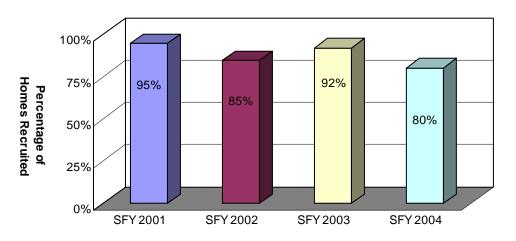

Chart 13: Foster Home Recruitment

Foster Home Re-evaluations

On an annual basis, at a minimum, DCFS is required to re-evaluate each foster home's ability to care for children. Of the 949 DCFS foster homes that were active at the end of the year, 911 had a current completed re-evaluation. The resulting compliance rate was 96 percent, two percentage points higher than SFY 2003 and also exceeding the goal of 95 percent compliance.

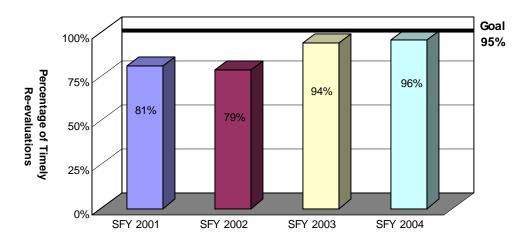

Chart 14: Foster Home Re-evaluations

Required Visits Made by Worker

DCFS policy requires that caseworkers make regular visits to children in foster care. The appropriate frequency is considered to be no less than weekly. Supervisors may approve a deviation from this frequency based on the needs of the child and the circumstances of the child's placement.

The information reported does not include all visits made to or on behalf of children in foster care. What is measured here is very narrowly defined. The caseworker must have chosen to document the purpose of the visit from a pick list of several different types of visit purposes. In order to meet the necessary criteria, the visit must have occurred in the home. Visits with the child made at school, during a doctor's visit or while providing transportation would not be counted in this report. Therefore, this section does not purport to completely report the frequency of all visits made with children in foster care, but only those visits that meet the defined criteria. The information reported below is based on visits made to children for whom weekly visits were necessary during the year. For example, 13 percent of the children who required weekly visits had 100 percent of those visits completed and 17 percent of the children had 75 percent of their required visits completed.

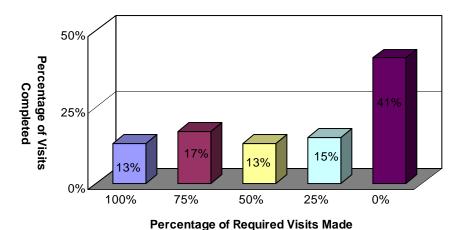

Chart 15a: Required Foster Care Weekly Visits Made by Worker

As previously stated, supervisors may approve a deviation from the weekly visit requirement based on the needs of the child and the circumstances of the child's placement. The information reported below is based on visits made to children for whom bi-weekly and monthly visits were determined necessary during the year. As the charts illustrate below, compliance with bi-weekly visitation requirements stood at 42 percent and monthly visits stood at 68 percent.

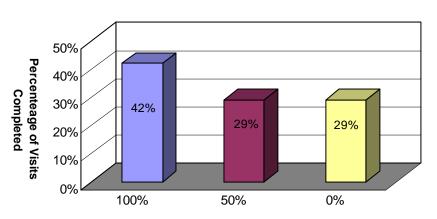

Chart 15b: Required Foster Care Bi-Weekly Visits Made by Worker

Percentage of Required Visits Made Required Visits

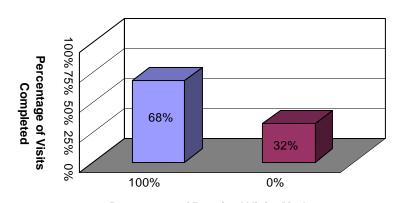

Chart 15c: Required Foster Care Monthly Visits Made by Worker

Percentage of Required Visits Made Required Visits

PART III: DESCRIPTION OF POPULATION AND SERVICES

This section describes the number and status of maltreatment assessments, children who were served in foster care and children who were provided adoption services.

Section I outlines the characteristics of children, such as age, gender and ethnicity, in true maltreatment reports. Additionally, this section describes the types of allegations in maltreatment reports.

Section II describes the foster care population, specifically; the characteristics of children in foster care, entries and exits of children in foster care, reasons children came into care, lengths of stay for children in foster care and in relative care, placements of children in foster care and the number of placements children experience while in care.

Section III focuses on adoption data such as the characteristics of children available for adoption, current placement of those children, characteristics of children placed in adoptive homes, children whose parents have had their parental rights terminated but have not been placed in an adoptive home, finalized adoptions and adoption subsidies.

APPENDIX F provides an area and county breakdown for Foster Care, Protective Service and Supportive Service cases.

Part III: Description of Population and Services Section I: True Child Maltreatment Reports

Child Maltreatment Assessments

There were 20,536 maltreatment assessments assigned during SFY 2004, an eight percent increase from SFY 2003 (19,536). Of those, 5,515 reports (27%) were found to be true, the same as the national percentage⁴. There were 8,004 victim children involved in the 5,515 true reports during SFY 2004. DCFS Area I had the highest percentage of true reports (34%) and DCFS Area IX had the lowest percentage of true reports (23%). (See APPENDIX A for area and county breakdown).

Table 2: Child Maltreatment Assessments

	Total Assessments	True Assessments	Percent True
SFY 2004	20,536	5,515	27%
SFY 2003	19,536	5,698	29%
SFY 2002	18,976	5,822	31%

_

Characteristics of Children in True Maltreatment Reports

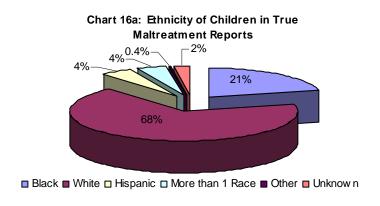

There were 8,004 victim children involved in true reports during SFY 2004. This number represented a two percent increase from SFY 2003 (7,841 children)⁵.

Table 3: Characteristics of Children in True Maltreatment Reports SFY 2004

Age	Gender	White	Black	Asian	AIAN	NAPI	His- panic	More Than 1 Race	Total
0 to 1	Female	162	59	1	0	0	18	20	260
0 10 1	Male	222	79	0	1	0	14	11	327
2 to 5	Female	632	163	2	2	1	49	34	883
2103	Male	593	187	0	2	0	62	38	882
6 to 11	Female	968	300	1	1	0	55	53	1,378
01011	Male	895	300	2	3	0	59	50	1,309
12 to 15	Female	912	277	1	2	1	53	50	1,296
12 10 13	Male	468	152	1	2	0	11	36	670
16 to 18	Female	409	97	3	2	1	22	20	554
10 10 16	Male	185	53	0	0	0	11	14	263
18+	Female	3	0	0	0	0	0	0	3
10+	Male	3	0	0	0	0	0	0	3
Total*		5,452	1,667	11	15	3	354	326	7,828

^{*}Demographic information was not entered into CHRIS for 176 children.

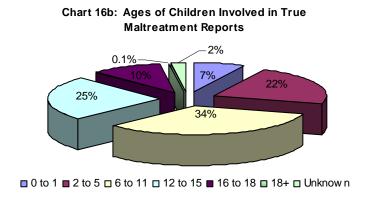

The chart below shows that 68 percent of the children involved in true maltreatment reports were white, while twenty-one percent of the children were black. Both reflect a decrease of one percentage point each from SFY 2003.

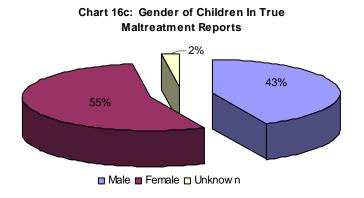

⁵ The table above, and each subsequent demographic table, divides up these other races and ethnicities into the following categories: "**Hispanic**," "**More than One Race**," "**Asian**" (includes Indonesian, Cambodian, Hmong and Vietnamese), "**AIAN**" (includes Native American, Alaskan Native and American Indian) and "**NAPI**" (includes Native Hawaiian and other Pacific Islanders).

_

The following chart shows that children between the ages of 6 and 11 represented the highest number of children involved in the 5,515 true reports during SFY 2004 (34%).

Fifty-five percent of the children involved in true reports were female, while 43 percent were male.

Children Involved in Allegations of True Maltreatment Reports

The majority of the 8,004 children in true maltreatment reports were involved in neglect allegations (64%) during SFY 2004, followed by sexual abuse allegations (28%) and then physical abuse allegations (23%)⁶.

Table 4: Percentage of Children Involved in True Allegations of Maltreatment SFY 2004

	SFY	2003	SFY	2004
Neglect	4,890	62%	5,158	64%
Physical Abuse	1,872	24%	1,877	23%
Sexual Abuse	2,331	30%	2,238	28%

-

⁶ The total number represented will outnumber the total children involved in true maltreatment reports because a child can be involved in more than one allegation.

Part III: Description of Population and Services Section II: Foster Care

Characteristics of Children in Foster Care

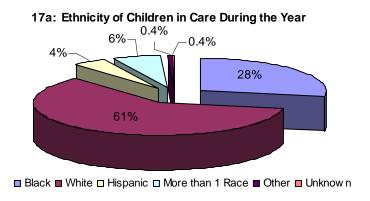

There were 6,433 children in foster care during SFY 2004, a four percent increase from SFY 2003 (6,213 children). This includes children who remained in care from the previous year as well as children who came into care during SFY 2004. (See APPENDICES B, C and D for an area and county breakdown of demographic information.) The table below describes the characteristics of children in foster care during the state fiscal year.

Table 5: Characteristics of Children in Foster Care During the Year SFY 2004

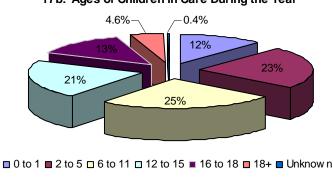

Age	Gender	White	Black	Asian	AIAN	NAPI	His- panic	More Than 1 Race	Total
0 to 1	Female	215	88	0	2	1	23	22	351

^{*}Demographic information had not been entered into CHRIS for 24 children.

The chart below shows that 61 percent of the children in foster care during the state fiscal year were white, while 28 percent of the children were black. National data reveals that only 37 percent of the children in the national foster care system were white, while 38 percent of the children were black⁷.

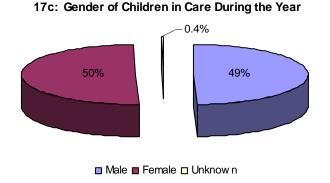

The following chart shows that children between the ages of 6 and 11 represented the highest number of children who were in care during the year (25%).

17b: Ages of Children in Care During the Year

The following chart shows the gender of the children in foster care during the year. Fifty percent of the children were female, while 49 percent were male.

⁷ Adoption and Foster Care Analysis and Reporting System (AFCARS) data submitted for children in foster care between 10/01/2000 and 9/30/2001 as of March 2003.

25

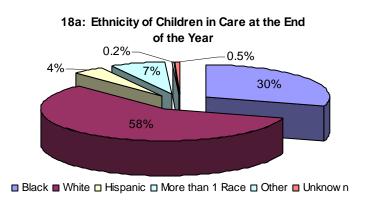

There were 3,241 children in foster care at the end of SFY 2004, a three percent increase from the 3,146 children in care at the end of SFY 2003. The following table outlines the characteristics of the children in foster care at the end of the latest state fiscal year.

Table 6: Characteristics of Children in Foster Care at the End of the Year SFY 2004

¹¹ Adoption and Foster Care Analysis and Reporting System (AFCARS) data submitted for children in foster care between 10/01/2000 and 9/30/2001 as of March 2003.

Permanency Goals of Children in Foster Care

The Division has two primary goals for children in foster care: safety and permanent placements. The second of these goals is achieved by setting a permanency goal for each child in foster care. For children in care during the year, more children had the goal to return home than any other goal. National data reveal very similar figures to those shown here¹².

Table 12: Permanency Goals of Children in Foster Care During the Year SFY 2003 – SFY 2004

Total*		448	229	0	0	0	19	61	757

^{*}Demographic data had not been entered into CHRIS for one child.

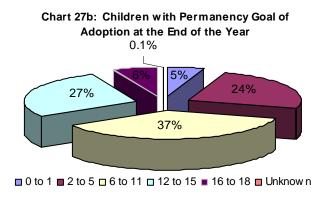

Fifty-nine percent of the children with the permanency goal of adoption were white, 33 percent were black and eight percent had more than one ethnicity.

Chart 27a: Ethnicity of Children with Permanency Goal of Adoption at the End of the Year

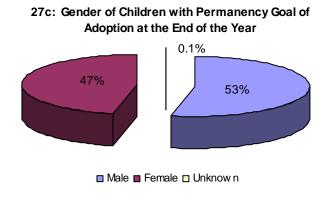

■ Black ■ White □ Hispanic □ More than 1 Race ■ Unknow n

Children between the ages of 6 and 11 continued to represent the largest group of children with the permanency goal of adoption at the end of the year. Children between the ages of 12 and 15 represented the second largest group of children (27%).

There were more male children (53%) than female children (47%) with the permanency goal of adoption at the end of SFY 2004.

Characteristics of Children whose Parents had their Parental Rights Terminated During the Year

There were 404 children whose parents have had their parental rights terminated during SFY 2004. The table below outlines the characteristics of those children.

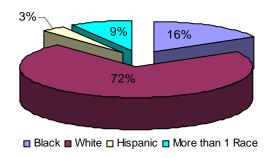

Table 19: Characteristics of Children whose Parents had their Parental Rights
Terminated During the Year
SFY 2004

Age	Gender	White	Black	Asian	AIAN	NAPI	His- panic	More Than 1 Race	Total

Total*		290	66	0	0	0	13	35	404

^{*}Demographic data had not been entered into CHRIS for 5 children.

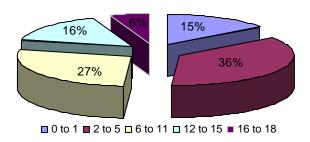

Seventy-two percent of the children whose parents had their parental rights terminated during SFY 2004 were white, while sixteen percent of the children were black and nine percent had more than one ethnicity.

Chart 28a: Ethnicity of Children whose Parents had their Parental Rights Terminated During the Year

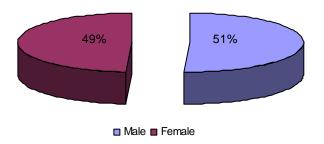

The two largest groups of children whose parents had their parental rights terminated were between the ages of 2 and 5 and children between the ages of 6 and 11.

Chart 28b: Ages of Children whose Parents had their Parental Rights Terminated During the Year

There were more male children than female children whose parents had their parental rights terminated during SFY 2004.

Chart 28c: Gender of Children whose Parents had their Parental Rights Terminated During the Year

Characteristics of Children Available for Adoption at the End of the Year

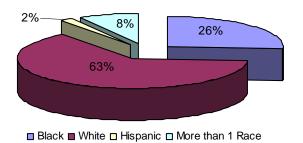

There were 498 children available for adoption at the end of SFY 2004. Demographic information for children available for adoption is very similar to previous reports.

Table 20: Characteristics of Children Available for Adoption at the End of the Year SFY 2004

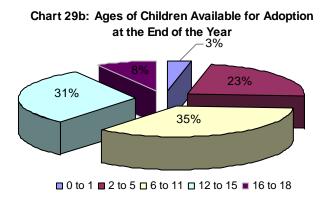

Age	Gender	White	Black	Asian	AIAN	NAPI	His- panic	More Than 1 Race	Total
0 to 1	Female	3	2	0	0	0	0	2	7
0 10 1	Male	5	4	0	0	0	0	0	9

Total		316	131	0	0	0	9	42	498

Sixty-three percent of the children available for adoption at the end of the year were white, while 26 percent of the children were black. The percentage of white children increased from 59 percent in SFY 2003, and the percentage of black children decreased from 32 percent in SFY 2003.

Chart 29a: Ethnicity of Children Available for Adoption at the End of the Year

There were more children between the ages of 6 and 11 available for adoption at the end of SFY 2004 than any other group of children.

There were more male children available for adoption than female children at the end of SFY 2004. Fifty-four percent of the children were male and 46 percent were female.

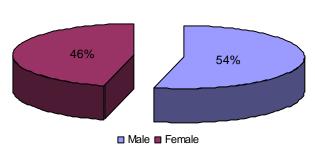

Chart 29c: Gender of Children Available for Adoption at the End of the Year

Current Placement of Children Available for Adoption

More children available for adoption at the end of the SFY 2004 were placed in DCFS foster homes than in any other type of placement. These results were similar to previous reports.

Table 21: Current Placement of Children Available for Adoption SFY 2004

Placement	Number of Children	Percentage
DCFS Foster Home	199	40%
Adoptive Home**	76	15%

16 to 18	Male	6	1	1	0	0	0	0	8
Total		272	100	1	0	0	15	26	414

^{*}Demographic data had not been entered into CHRIS for three children.

Of the 417 children in pre-adoptive homes during the year, 65 percent were white, compared to 62 percent in SFY 2003, and 24 percent were black, compared to 25 percent in SFY 2003.

Chart 30a: Ethnicity of Children Placed in PreAdoptive Homes During the Year

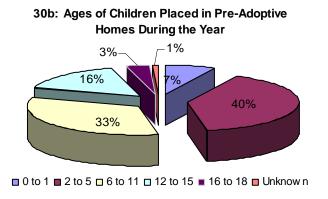

0.2%

0.7%

24%

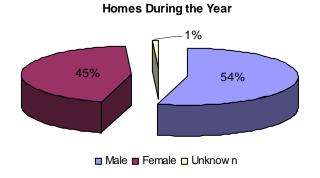

■ Black ■ White □ Hispanic □ Other ■ More than 1 Race ■ Unknow n

The largest group of children placed in pre-adoptive homes was between the ages of 2 and 5 (40%). The smallest percentage of children placed in pre-adoptive placements, whose ages were known, was children who were between the ages of 16 and 18.

Of the 417 children placed in pre-adoptive homes during SFY 2004, 54 percent were male and 45 percent were female.

30c: Gender of Children Placed in Pre-Adoptive

Children not Placed in Pre-adoptive Homes whose Parents had their Parental Rights Terminated

There were 393 children whose parents had their parental rights terminated who were not placed in pre-adoptive homes. This number was derived by subtracting the number of children placed in adoptive homes at the end of the year (105) from the number of children available for adoption at the end of the year (498).

Special Needs

There were 247 children with special needs who were placed in pre-adoptive homes during SFY 2004¹⁴. Children with special needs are defined as children who have severe medical or psychological needs that require ongoing treatment. Other children may be considered special needs if they are a Caucasian child over the age of nine, an African American child who is two years old or older, or a child who is a member of a sibling group of three or more that is being placed together with his or her sibling.

Table 23: Children with Special Needs Placed in Pre-adoptive Homes SFY 2004

Special Need Condition	Number of Children
Race	178
Age	237
Member of sibling group	89

-

¹⁴ This number does not take into account children with severe medical and psychological needs because this data is not available in CHRIS (AR Children's Reporting and Information System). As enhancements are made to the data system to capture this information, the data will be provided in future reports.

Characteristics of Children with Finalized Adoptions

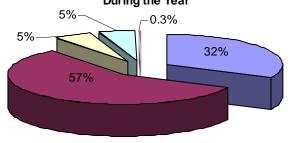

There were 328 children whose adoptions were finalized during SFY 2004. The characteristics of those children are outlined in the following table.

Table 24: Characteristics of Children with Finalized Adoptions SFY 2004

Age	Gender	White	Black	Asian	AIAN	NAPI	His- panic	More Than 1 Race	Total
0 to 1	Female	6	1	0	0	0	3	1	11

Total		187	106	1	0	0	18	16	328

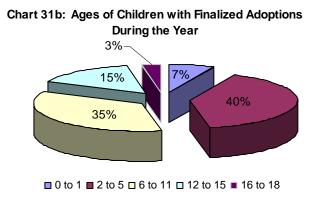

There were 328 children whose adoptions were finalized during SFY 2004. Of those, 57 percent were white, 32 percent were black and five percent were Hispanic.

31a: Ethnicity of Children with Finalized Adoptions
During the Year

■ Black ■ White □ Hispanic □ More than 1 Race ■ Other

Children between the ages of 2 and 5 represented the largest group of children whose adoptions were finalized during SFY 2004.

Fifty-four percent of the children whose adoptions were finalized during SFY 2004 were male, and 46 percent of the children were female.

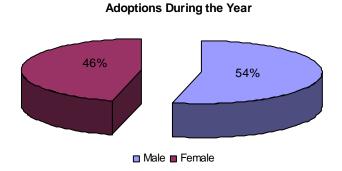

Chart 31c: Gender of Children with Finalized

Subsidized Adoptions

There were 297 children who began receiving adoption subsidies during SFY 2004. Of those, 262 children received federally-funded subsidies, while 35 received state-funded subsidies.

Characteristics of Children who Receive Adoption Subsidies

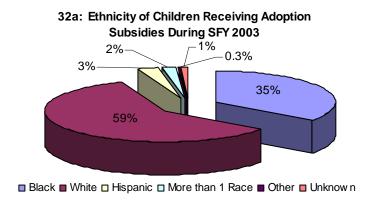

There were 2,363 children who received adoption subsidies during SFY 2004. The following table outlines the characteristics of those children.

Table 25: Characteristics of Children Receiving Adoption Subsidies SFY 2004

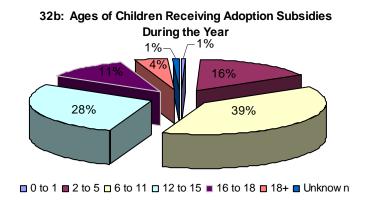

Age	Gender	White	Black	Asian	AIAN	NAPI	His- panic	More Than 1 Race	Total
0 to 1	Female	1	2	0	0	0	1	2	6

^{*}Demographic data had not been entered into CHRIS for 20 children.

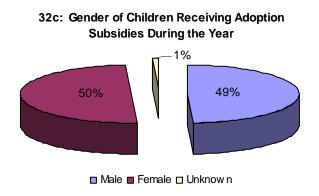

Fifty-nine percent of the children receiving adoption subsidies during the year were white, while 35 percent were black.

Children between the ages of 6 and 11 represented the largest group of children receiving adoption subsidies.

Fifty percent of the children receiving adoption subsidies during the year were female, and 49 percent were male.

Non-Foster Parent Adoptive Homes

There were 189 adoptive homes available at the beginning of SFY 2004 and 157 new homes approved during the year. Of the 346 adoptive homes available for placement during the year, 104 had children placed within them during the year.

Table 26: Non-Foster Parent Adoptive Homes SFY 2004

Homes available for placement at beginning of year	189
News homes approved during the year	157
Homes in which children were placed during the year	104
Homes that closed without a placement	12
Homes that experienced a disruption	12
Homes available at the end of the year	242
